

EPUG-UKI meeting – 29 March 2011

Product strand sessions – Agenda

Product strand breakout sessions (11:50-13:00)

Aleph

Aleph product update

Alex Follet, Ex Libris

LJMU's experience of using the DLA and Aleph Inventory to assist with stock management

Nick Adamson, Liverpool John Moores University

Since going live with RFID in October 2009 we wanted to use the 3M Digital Library Assistant to assist us with stock management. We first trialled the DLA in early 2010 and then extended its use to provide input for the Aleph Inventory from Autumn 2010. This has resulted in our first ever attempt at a full stock check.

Exporting data from Aleph for loading into an inventory device

Fay Harrison, Nottingham Trent University

Introducing the new ALEPH ILL module co-ordinator

Robert Watt, King's College London

SFX and MetaLib

Introducing the new SFX-MetaLib product strand co-ordinator

Andy Ekins, Canterbury Christ Church University

SFX product update

Christine Stohn, Ex Libris

Living with SFX v4 – a Q&A session

Andy Ekins, Canterbury Christ Church University

Stephen Graham, Queen Mary, University of London

Andrew Brown, University of Swansea

Themes and topics for future sessions – an open discussion

Voyager

Introducing the new Voyager product strand co-ordinator

Judith Smart, University of Strathclyde

A go-round: recent Voyager activities and near-future plans

Online payments: Voyager and WPM

John Humphreys, University of the Arts London

Themes and topics for future sessions – an open discussion

Voyager product update

Robert Bley, Ex Libris
